Amaryllis

Christmas ready

Hadeco Amaryllis are an exciting new development in the Horticultural world. These South African bulbs have big flowers on shorter, stronger scapes and more stalks from smallish bulbs. The leaves often grow simultaneously with the flowers. All Hadeco varieties have passed through extensive testing and are among the very best hippeastrum hybrids in the world. They are selected to be easily forced, long lasting and disease resistant. Symphony varieties are the largest, yielding big 6" to 8 3/4", saucer shaped flowers on 14" to 18" stems.

Merry Christmas This huge Symphony variety is bright Orient-red and is one of the two best, large, solid red varieties for Christmas. Its huge flowers measure about 8 3/4" across on short, stout stems that grow to only about 12-14" tall. Harvest bulb size: 26 cm. Previous year's top-selling favorite had rave reviews and is back for another cheerful Christmas.

Snow White A fully double Symphony variety with huge, 8", frilly, glistening white flowers borne on 12" stems. She is as extravagant as she is beautiful. Harvest bulb size: 26 cm.

Dutch Amaryllis

Flamenco Queen

A big, bold beauty sporting a white background with picotee rims and heavy streaking and feathering with vivid cherry red, all offset by a cool green center. It has an incredible depth of color that puts it in a class of its own.

Naturalizing Narcissus

Avalanche Heirloom Tazetta-type, once known as "Seventeen Sisters" for the clusters of 15-20 small 1" white flowers with pale yellow cups on one stem. It has a musty-sweet fragrance. 18" early.

Erlicheer Naturalizing heirloom with stems of 6-10 double white flowers resembling gardenias, with ivory centers and hints of yellow. Fragrant.

Other

Lycoris aurea - Yellow Spider Lily A golden yellow version of "naked lady", it is a bouquet in itself. 18-24" tall with flower clusters up to 8" across, each composed of 5-6 flowers with wavy-margined curved back petals and long yellow stamens, it is a true fall showstopper. Will bloom one year after planting. Leaves last all winter.

Ranunculus - ~~pastel~~ picotee mixture. Annual tender bulbs to plant in the fall for spring blooms with long-lasting, camellia-like, ruffled flowers with darker centers and lacy foliage. Gorgeous both in the garden and when cut for bouquets, these prolific bloomers respond with enthusiasm when picked, sending out even more blooms. Jumbo corms for more and bigger blooms. Unique color mixture not available in stores.

Dutch Iris Annual, which may return if in a well-drained location. Mixed colors include yellow, blue, violet, purple and white.
